

# Thank You!

2005 is a significant milestone for the Snoqualmie Watershed Forum. 2005 represents the successful completion of the first interlocal agreement between government partners in the watershed and the beginning of a new 5-year interlocal agreement to further our important work.

The new agreement welcomes the Snoqualmie Tribe and continues the role of the Forum as a regional venue for discussing the future of our watershed. Over the years the Forum has crafted policies, influenced programs, funded projects, and been a coordinated voice for

Snoqualmie Valley interests on salmon and water resource issues.

Many, many people have played a critical role in the success of the Snoqualmie Watershed Forum and you are one of them.

*Thank you* for your contributions and for setting the foundation for our continued success.
